### **RackTop Systems Selected as a Finalist for SC Media's 2019 Trust Award**

*RackTop's flagship BrickStor CyberConverged platform for storage and security shortlisted as Best Business Continuity/Disaster Recovery Solution*

FULTON, Md. – Jan.16, 2019 – [RackTop Systems](#), the pioneer of CyberConverged data security has been selected as a 2019 Trust Award finalist in the Best Business Continuity/Disaster Recovery Solution category.

“Every new year brings with it an unpredictable mix of adversity and opportunity for information security professionals,” said Illena Armstrong, VP, editorial, SC Media. “In 2018, we watched as ransomware took down entire city governments, popular online platforms were accused of mishandling user data and technology giants announced an unprecedented industry-wide effort to solve the Spectre and Meltdown CPU vulnerabilities. Through it all, this year’s SC Awards finalists found ways to break boundaries, overcome challenges and contribute fresh new ideas to the world of cybersecurity.”

RackTop’s BrickStor is an integrated network attached storage and secure data management platform that protects sensitive data from insider threats and cyberattacks while meeting internal and regulatory compliance requirements. By unifying multiple key functions under a single NAS platform – such as automatic data backups, data replication, ransomware protection, encryption key management, real-time analytics and policy-based security – BrickStor helps enterprises easily manage shared, distributed storage resources while reducing cost and complexity, optimizing operations and improving security.

The annual SC Awards are recognized as the industry gold standard of accomplishment for cybersecurity professionals, products and services. With the awards, SC Media recognizes the achievements of cybersecurity professionals in the field, the innovations happening in the vendor and service provider communities, and the vigilant work of government, commercial and nonprofit entities.

“We’re honored to have our BrickStor platform recognized by SC Media as one of the top solutions for business continuity and disaster recovery,” said Jonathan Halstuch, co-founder and CTO of RackTop Systems. “Being named as a Trust Award finalist further validates both the innovation of our BrickStor product and our company’s vision for the CyberConvergence of data storage, security and compliance.”

“In a vast sea of security solutions and services, the Trust Award finalists stand out for their cutting-edge, high-quality features and user-friendly policies,” added Armstrong of SC Media. “RackTop has emerged as a true leader in its space and has earned this honor.”

The finalists and winners for the Trust Awards are chosen by an expert panel of judges with extensive knowledge and experience in the cybersecurity industry. Winners will be announced at the SC Awards ceremony on March 5, 2019 in San Francisco. For more information about the awards program, visit <https://www.scmagazine.com/2019-trust-awards/>.

### **About RackTop Systems**

RackTop Systems empowers organizations globally as the leading provider of high-performance cyberconverged network attached storage (NAS) that is embedded with advanced security, encryption and compliance. Headquartered in Fulton, Md., RackTop was founded in 2010 by veterans of the U.S. intelligence community who have been solving the most complex data and security problems for more than two decades. RackTop’s technology has been deployed at numerous organizations in a variety of industries worldwide, including government/DoD/public sector, media/advertising and entertainment, financial services, healthcare, higher education and life sciences.
